

Four Angels Cleaning Website Phase 2

25th March 2025

Requirements

Phase 2 website development

Objective: Build a function in the client portal that gives clients access to a number of files that are fixed. These files will be uploaded and maintained by admin from the admin my account page. Both areas can operate similar to a windows file explorer.

Features:

- Clients should be able to view the files, they could be, word or PDF file types.
- Clients should also be able to download.

Timeline

- Delivery is expected by Friday 11th April.
- Developer time 5 days
- Target start date: 28th April (Subject to agreement)
- Target complete 5th March

Cost

- Developer to share details on quote 27th March

Client Area

Welcome back,
We're glad to have you here.

Health & Safety Documents Area Example

A recommendation is looking like File Explorer

Admin will be able to edit and change, add and remove documents from this area.

Function should have the ability to have files and folders.

Client will only view and be able to download the same files which cross sync to all client accounts.
